30 Semester Hours

Old Dominion University September 2007 – May 2008

Western Branch High School September 2003 to June 2007
Graduated – Advanced Diploma

EMPLOYMENT HISTORY

Lockheed Martin- Sub Contractor
Training Assistant
April 2019- August 2019

I assisted in training the east coast Navy SEALs along with DEVGRU. I also assisted in training the F.B.I., D.E.A., C.I.A., N.S.A., and also state and local police S.W.A.T. teams. Besides helping in the training a lot was classified.

Warehouse Specialist.
PROFESSIONAL ANALYSIS INC. - Navy Contractor.
May 2017 to October 2017

In this position I would pull, store, and inventory material for the Military Sealift Command. Also, I was required to unload flatbed and tractor trailer trucks with forklifts. I conducted material receipt, inventory and inspection. I received and verified materials against manufacturers shipping and packing list. QA'd the condition of the material for shortage/damage that may have occurred in transit. Verified the part numbered items to a National Stock Number (NSN) using Corrective Maintenance Logistics

System (CMLS). When researching a part number/NIIN, It was required to check the HAZMAT (HMIC), CLASSIFICATION (CIIC) and DEMIL codes with the unit of issue (UI). I assisted the RRAM supply tech personnel in daily ERP activities. Some occasions when unpacking equipment from tri-walls, tech manuals would be found. Due to the importance of controlling these manuals, they were turned over to the government Rep.

Student Trainee, WG-5.
Naval Facilities Engineering Command (NAVFAC MIDLANT).
August 2012 – March 2016

This position was an apprenticeship. I learned how to repair and replace fans, pumps, thermostats, motors, compressors and other HVAC related elements. I also learned the brazing skill it requires to install these items, how to install refrigeration and air conditioning systems and other refrigeration system work. As a holder of the ESCO Institute Universal Technician certificate, I am certified in the proper refrigerant handling techniques required to use and transport the refrigerants used in HVACR. I drove two ton government trucks for delivery of HVAC equipment.

Facilities Maintenance Worker.
Quality Investments Management Co., Inc.
June 2011 – August 2012

I worked maintenance duties for the Waterview Colonial Manor Apartments. My duties include renovation and maintenance of apartments. This entailed electrical, plumbing, woodworking, plastering, and general construction cleaning. I also, worked the work orders called in from the residents and addressed their problems.

Shipping & Receiving Clerk.
A2Z, INC.- Navy Contractor.
June 2008 – March 2011

Using a 1348 document, I pulled material for issue using the LAWSON / RRAM System and packaged the material for shipment. I maintained stock control and inventory using LAWSON. I stowed material received from shipboard offloads and from other naval activities. On occasion, I performed technical research using FEDLOG/LOGICOM to determine if the part number and/or stock number matched the correct item. At this time, the RRAM system only accepted stock number items, so all part number items were researched for correct NIINs. I assisted the Hazardous material control manager in preparing and shipping of HAZMAT. I have assisted with preparing of MTIS, DRMO and ATAC material for local material and delivered using a government truck. I checked the validity of inventoried materials and have participated in general warehouse clean up.
